

## *Bespoke* **acoustic solutions**

We specialize in bespoke solutions and strive to always provide you with the best service and the highest quality. Learn more about our manufacturing process, from raw panels to one-of-a-kind designs with added acoustic value.

### **Quote**

Contact our sales team for a suitable offer. To be able to support you in an optimal way, we need a DWG file or a vectorised PDF in the correct scale in advance. Please find out more about the technical requirements for bespoke products in the Design Guide in the download area on our website.

1-3 business days

### **Design**

Based on your information, we will create an individual cutting plan for you. After your review and approval, your individual project goes directly into our production and is cut according to your wishes.

3 business days

### **Production**

Depending on your location, we produce your order tailor-made and under the highest quality standards in Switzerland or in the Philippines. We stand for Swiss craftsmanship and precision. Your products will be packed individually and environmentally friendly.

3-5 weeks

### **Shipping**

Your products are now on their way to your location. We will keep you informed and notify you in advance.

We hope you enjoy our products and services and are happy making an impact on people and planet with us.
